

"The new dashboards are working perfectly! They've reduced my monthly reporting task from a multiple day effort to about an hour. We've also been able to share with our Risk team so they can self-serve scorecard metrics, instead of waiting on me to provide. We've sent these to Support Groups so they can check their data quality in real time. Previously, I would have to run my tedious reports to update the scores. we are seeing the exact return on investment we hoped." -

ServiceNow Process Owner, VividCharts customer, Financial Services

"Great product and fantastic support. The platform is fairly easy-to-use and offers lots of options out-of-the-box. The ability to translate some of the ServiceNow's Platform UI reporting tools to the service portal brings a whole new experience for the end user that can be critical. Finally, the support we currently got from Mitch and the rest of the Vividchart team has been fantastic. I would definitely recommend Vividchart to any CIO or software engineer currently using ServiceNOW." -Software Engineer, Managed Health

Care Services, G2 Crowd Review

"Great Product for dashboards in ServiceNow. I was able to create a Dashboard in the first few minutes of using the product! The documentation and assistance from the VividCharts team is 2nd to none. Not much to dislike in VividCharts, their user interface is making great strides with each new release and is now easy enough to use for any ServiceNow user. VividCharts is allowing us to publish beautiful real-time dashboards and presentations in ServiceNow. This is saving us significant energy extracting the data just to make it pretty for executive presentations while at the same time allowing us to have up to date information whenever it is requested." - ServiceNow Development Lead, Airline
